CLAIMS UNDERLINED AND BRACKETED WITH STATUS IDENTIFIERS

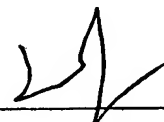

1. (Original) [Two distinct and separate fasteners will be placed on either sides of the top wear clothing.]

(Currently amended) A one size fits wear comprising:

A main body having a plurality of fabrics forming a seam portion having a lower peripheral edge, wherein at least some of the said plurality of seams are composed of both uniaxially and multiaxially adjustable fastener aligned to stretch accordingly only in peripheral direction so that the said main body has an appearance of being adjusted rather than expanded, said uniaxially adjustable fastener being woven fabric so that the said main body is expanded to fit a range of torso sizes.

2. (Original) [The fastener is located at the left side of the top wear clothing and extends from the wrist, along the arm pits and down to the side end of the top wear clothing. There will be 1 fastener and no less than 1 and no more than 9 receiving ends placed along the said origins at any one time.

Application No.: 10/644,863  
Art Unit: 3765  
Filed: 08/21/2003

Examiner: Hoey, Alissa L

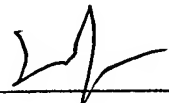

(Currently amended) A one size fits wear as claimed in claim 1, wherein the adjustable fastener is sewn to an interior of the seam portion of the said main body.

3. (Original) [The fastener is located at the **right** side of the top wear clothing and extends from the wrist, along the arm pits and down to the side end of the top wear clothing. There will be 1 fastener and no less than 1 and no more than 9 receiving ends placed along the said origins at any one time.]

(Currently amended) A one size fits wear as claimed in claim 1 having the appearance of being fitted while actually being adjustable to fit a range of sizes.

4. (Original and deleted) For all Claim 2 through Claim 3, the percentage length of the fastener ranges from 0.1% to 100%.
